

Regional Airport Planning Committee

January 8, 2009

TO: Regional Airport Planning Committee
FROM: Staff of the Regional Airport Planning Committee

SUBJECT: Presentations by San Francisco International Airport (SFO), Oakland International Airport (OAK) and San Jose International Airport (SJC) on Greenhouse Gas (GHG) Emission Reduction Strategies

At the June 27, 2008 RAPC meeting, the Committee expressed an interest in hearing from the Bay Area's three main commercial airports-SFO, OAK and SJC-on the current strategies that each airport is pursuing to reduce the GHG emissions associated with airport operations. Each airport will have a representative provide RAPC with a 10 minute presentation on these strategies and be available for questions from the Committee. Julian Potter, SFO's Federal and Regional Government Affairs Manager, will give an overview of the efforts that SFO is undertaking to reduce the GHG emissions at SFO. Cary Greene will provide a brief presentation on the work that SJC is doing to reduce these emissions and Kristi McKenney will present this information for OAK. Staff will prepare a summary of this information for RAPC which will also include a brief discussion of similar efforts that are underway at other airports. This summary will be made available to RAPC at its March 27, 2009 meeting.
